

CALL FOR PAPERS

Tanzanet Journal Special Edition on Housing in Developing Economies (Tanzania)
2005 Vol.6(3) Special Issue Dr. Primus V. Mtenga, Special Issue Editor

THEME OF THE SPECIAL EDITION

This *Tanzanet Journal Special Edition* is intended to provide a forum for sharing experiences related to sustainable approaches in providing affordable durable housing in developing economies. Housing is a multidisciplinary endeavor that encompasses social science related issues (such as conformity to acceptable customs and assimilation of emerging technologies), economics and financing issues, engineering issues, material issues, environmental issues, etc., etc.

Thus, papers are invited in the following categories as they are related to housing in developing economies, such as Tanzania:

- Local building materials for housing (success stories and innovations or improvements of these local materials).
- Socio-cultural issues associated with changing traditional building practices and materials, for example introducing significant windows in traditional "tembe" construction.
- Durability of traditional dwellings in relation to impact on the environment.
- Home financing/mortgage availability and sustainability.
- Energy issues, e.g wind and/or solar power for material processing and powering the home.
- Construction practices-labor costs vs affordability.
- Town planning, infrastructural and land development issues.
- Housing industry in general and economic development (material industry, fabrication facilities, mechanization, multiplier effect etc, etc)
- OTHER housing related issues.
